

## A simple, no-cost, system to communicate, manage, and publish business processes everyone will understand.

Within hours, managers and staff will be building better ways for your business to operate by publishing process maps that everyone will understand. And every TaskMap can be published to PDF files and web pages using Visio Professional.

## Typical Applications

- Communicate current work processes
- Review existing work processes
- Create “future state” process maps
- Reduce risk and improve compliance at a low cost
- Increase efficiency
- Create simple work breakdown structures
- Shorten process definition and rollout
- Increase Efficiency
